Admission fees only apply to  
planetarium screening

The planetarium screening  
lasts 30 minutes.

Ticket	Adult	Children from age 3 until high school
『3D dome theater』	¥500	¥250

**Welcome to the hills of scientific experimentation**

As a vibrant hub of exchange for science and human resource development. Science Hills Komatsu is full of fun, surprise, and charm. In these hills, there is a "Museum of Science and Manufacturing for People and Things" where you can experience science and manufacturing. Experiment with curiosity to your heart's desire. This hill is a place where everyone can grow. It is "Creating the future through Human development and manufacturing."

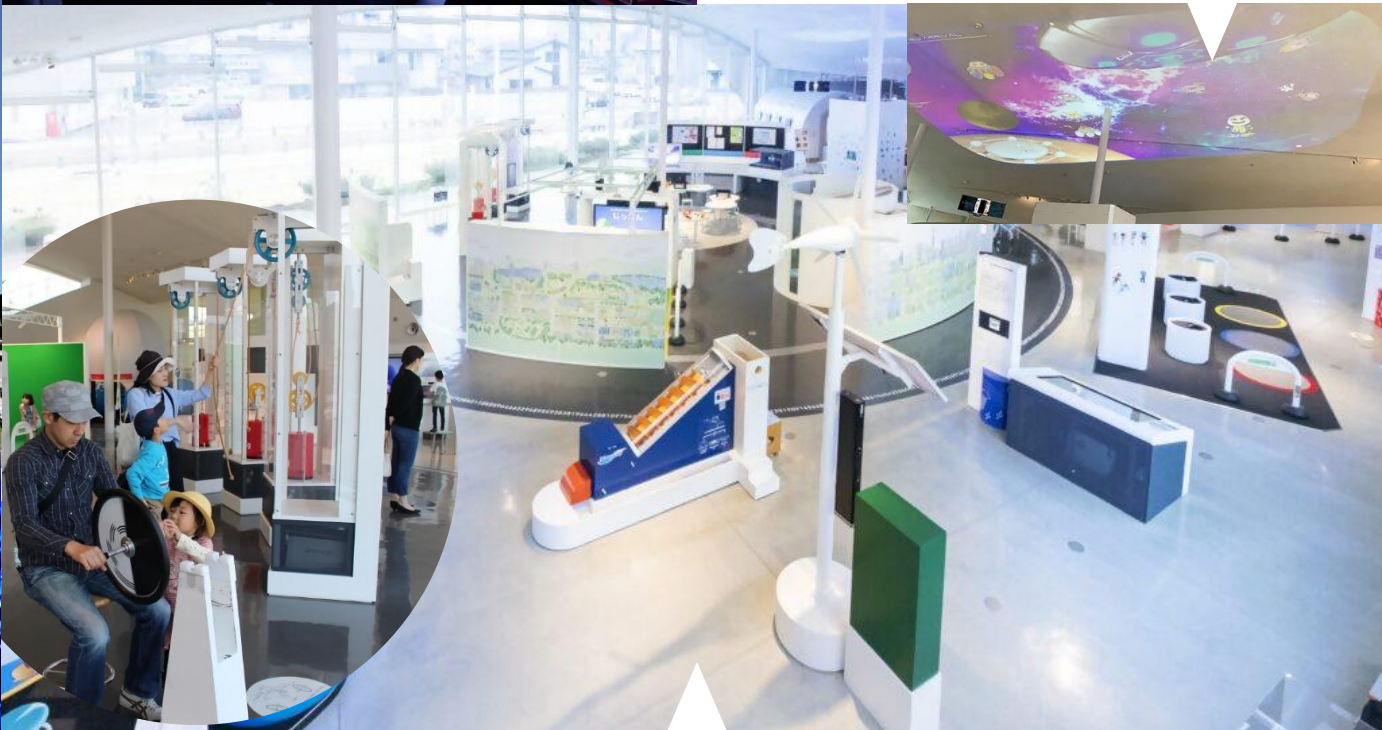

Screening Schedule

### 3D Studio

It is equipped with a 4K projector that can screen science-related programs with bright and beautiful images. Cultivate curiosity and become immersed in the giant projection as though you are right there.

### Drawing flight

Wonderland also offers participatory projection mapping. You can color in and fly rockets, aliens, and UFOs.

### WonderLand

An experiential exhibition zone where you can see how science and technology are used in manufacturing sites. Everyday mysteries and children's "Why?" and "How come?" questions are transformed into moments of wonder and excitement.
